The dog shall remain in the custody of the Animal Services Department pending trial and the owner shall be responsible for boarding fees.

10-8-5.–10-8-6. Reserved.

10-8-7. Speed hump policy.

10-8-7.1. Speed hump policy - Purpose.

The purpose of this policy is to provide for the installation of speed humps to calm traffic along neighborhood streets. Speed humps will be designed to meet the needs of a particular situation; and the actual features, spacing, layout and other elements of the overall design will be determined by the particular circumstances of the case under consideration. This policy is designed to provide reasonable opportunities for the installation of speed humps on specified types of residential streets based upon technical criteria, the degree of support from the residents along the proposed street, and the street conditions.

10-8-7.2. Speed hump policy - Eligibility requirements.

In order for a street to be considered for speed hump installation, the street on which the speed hump is proposed must meet the following technical requirements:

- (a) *The proposed street must not be classified as an arterial street as specified in the most recent edition of the City of Hot Springs Street Specifications Ordinance;*
- (b) *The proposed street should have no more than two traveling lanes, one in each direction, and not greater than 42 feet in width;*
- (c) *Traffic volumes on the proposed street must be more than 500 vehicles per day (vpd), but less than 1,500 vehicles per day (vpd);*
- (d) *The proposed street shall have a posted or prima facie speed limit of 35 mph or less, as determined in accordance with state law;*
- (e) *Street grades shall be eight percent (8%) or less approaching the hump;*

- (f) *The 85th percentile speed of the traveling traffic on the proposed street must be equal to or greater than 10 mph over the posted or prima facie speed limit and a minimum 85th percentile of 38 mph. The 85th percentile speed means the speed at or below which 85 percent of the vehicles are traveling, as determined by a speed study;*
- (g) *The street must not be an identified primary route for emergency response by local police, fire or EMS services; and*
- (h) *If approved, the location guidelines as specified in Section 6 hereof could be met.*

Once a properly completed application has been received, the traffic review committee will initiate the following evaluation process:

- (a) *The traffic review committee will review the application in order to determine if the proposed street segment meets the eligibility requirements. If the application does not meet the basic eligibility requirements, the evaluation process will be terminated; and the applicant will be notified in writing that eligibility requirements are not met. If the application meets the basic eligibility requirements, the traffic review committee shall so notify the applicant and request that the applicant submit a "neighborhood support petition." The petition shall be in such form as prescribed by the City. The neighborhood support petition must be signed by at least one adult representative from not less than sixty percent (60%) of the households in the affected neighborhood and must be submitted to the traffic review committee within sixty (60) days from the date of the City's eligibility determination notice. For purposes of this policy, "affected neighborhood" means all households located or situated in proximity to the proposed speed hump location such that the most convenient direction of travel from the household to the nearest highway, arterial street, or major collector street would require that the residents thereof routinely traverse the proposed speed hump. The traffic review committee shall determine the affected neighborhood based on the above definition and shall provide the applicant with a map illustrating the affected neighborhood.*

The boundaries of the affected neighborhood may be reasonably modified by the traffic review committee to meet the intention of this policy based on actual street configuration (e.g., breaking local street segments that exceed 1,000 feet from the proposed speed hump location in either direction, etc.).

- (b) Once a completed application and neighborhood support petition have been received, the traffic review committee shall provide notice to the neighborhood by regular mail or hand delivery.*
- (c) Following the delivery of the written notice and upon waiting 15 days for response by the neighborhood, the traffic review committee shall forward a recommendation in a report to the Board of Directors.*

The City Engineer or the traffic review committee may recommend variances from the standards and guidelines when field conditions do not permit strict compliance therewith. Any such variances shall be included in the traffic review committee report and considered by the Board of Directors.

10-8-7.8. Speed hump policy - Cost responsibility.

The City of Hot Springs will bear the responsibility of the cost for speed hump installation, including humps, signs, pavement markings and, if necessary, special design features such as delineators.
